

Sequoyah patient's denture experience one-of-a-kind

By Shana Raley-Lusk

"Before getting my new custom dentures from Sequoyah Dental Arts, I always smiled with my mouth closed," says Victoria, one of Dr. Pablo Foncea's recent denture patients.

teeth at a rapid pace as a result.

"I was looking for a job at the time and it was really depressing because everywhere I went they were looking at my mouth," she remembers. "I was embarrassed to show my teeth. I even had gaps between them."

But upon her first visit with Foncea at Sequoyah Dental Arts, Victoria learned what many local denture patients already know first-hand.

"As soon as I walked into the office at Dr. Foncea's, I was offered coffee and snacks. It was unlike any dental office I have ever visited before," Victoria says.

She remembers Foncea telling her that he was sure he could fix her smile with custom dentures.

"The whole process was painless and I really just felt so relaxed. I could even bring my own music to listen to during the process," she says.

The staff at Sequoyah Dental Arts takes great pride in the beautiful custom cosmetic dentures that they offer. While many other dentists offer generic dentures, Foncea is able to create a custom denture that fits the patient's face and is overall more aesthetically pleasing. Because he evaluates each patient individually, Foncea is able to provide the

most natural-looking denture available. He views the process as art, creating the most ideal-looking smile possible for each individual patient's face.

"As soon as I was done, I could see such a huge difference," Victoria recalls. "I looked 10 years younger and even had a brand new job within a week of getting my new dentures. It just gave me so much more self-confidence."

Like many of Foncea's patients, Victoria says that custom dentures changed her life. After such a positive experience with Sequoyah Dental Arts, Victoria even decided to take her daughter there for braces.

"I never want my daughter to have to go through what I did with being ashamed of her teeth," she says.

Foncea's unique way of creating one-of-a-kind dentures while also taking the greatest care with his patients truly sets his practice apart.

"I love the staff there," says Victoria. "They are just the most pleasant people. And I have never liked going to dental offices, but this experience was totally different. I never even needed any pain medicine during this whole process."

Dr. Foncea says that some of the most dramatic smile makeovers that he has done have been those of denture patients. His specialized approach to creating beautiful smiles has changed the lives of Victoria and so many others like her.
