# A Beautiful Smile in a Snap

**DID YOU KNOW** that your smile is the first thing people notice about you, and, according to a recent survey by the American Academy of Cosmetic Dentistry, nearly 100% of those surveyed believe that a great smile is an important social asset?

If you're self-conscious about your smile because it's not as attractive as you would like, the good news is there's been a revolution in dentistry, with more cosmetic options available now than ever before. Procedures can be as simple as whitening or a contouring appointment or as detailed as a complete smile makeover – the choice is yours.

Pablo Foncea, DMD

Very often patients think they would like to restore their smile, but they can't quite visualize what it will look like. We are proud to offer our patients an instant smile simulation. Our new technology, Snap Smile Imaging, allows us to simulate a photograph of our patients with their new smile in less than 10 minutes.

*"I have never had such gentle care. Dr. Foncea is the nicest and most comprehensive dentist I have ever been to!" – Pat Allen*

Snap Smile is truly revolutionary and combines a dental imaging camera, proprietary software, and photographic output device to record your current smile and then to simulate your new smile. Using one or more of the cosmetic procedures available, you will be truly amazed at this side-by-side comparison that Snap Smile provides.

If you feel your smile is impacting your career or relationship, I invite you to call me today. Schedule a cosmetic dentistry consultation and complimentary image, and discover the great smile that can be yours.
